

# Safety Analysis

**Topic:** Outside Recess/ Play Area

**What are we doing well?**

- Parent/Volunteer Supervision
- Fences set-up for construction

**Areas for improvement and suggestions:**

- Improve shade- purchase umbrellas to provide shade to scholars during recess
  - Loading dock on playground - Scholars are playing on the dock, mainly to get out of the sun. Concern is that they will fall from the dock. Providing shade would alleviate scholars congregating in that area.
- Construction- improve barriers between workers and children
- Electrical distribution house on playground: Scholars can fit behind it. We can't block access to the electrical housing, but we may want to consider blocking the space to get behind it.
- Scholars are claiming to find snakes in the areas around the playground where there is brush. Continue to check and monitor. Groom area if needed.
