

Safety Analysis

Topic: Drop-Off

What are we doing well?

- Professional Handshake
- Communication- Emails about traffic patterns
- Signs at drop-off points
- Staggered Starts
- Cones in parking areas where you are not allowed to park

Areas for improvement and suggestions:

- Dual purpose lanes on East Side- clarify if lanes should be double stacked
- People not following the drop-off point area and dropping scholars off outside of designated area
- School marshal randomly onsite during drop-off
- Traffic flow for west parking area.
 - From what direction should cars enter that parking lot?
 - From what direction should cars exit that parking lot?
- Turn drop-off signs 90 degrees so that they are visible to drivers
- People dropping off scholars on East side and scholars are walking through traffic to get to the sidewalk
