Safety Analysis

Topic: Front Entrance

What are we doing well?

- License scanning

- Greeting at front desk

Areas for improvement and suggestions:

- Question check at the first point of entry doors

    - Minimum of reason for visit, scholars name and grade

    - Potential to add a security code assigned to/ picked by each family which visitors must give at first and/or second door

- Schedule our safety resource officer to visit during special events since doors are open to all visitors

- Installation of new security window at front desk that limits easy access to front office through the window

- Security cameras- do we have them? Are they located in the front office area and outside of the front door?

- Installation of concrete blocks/balls to prevent vehicles from driving through front office area windows
