

Safety Analysis

Topic: Construction of New Wing

What are we doing well?

- Good communication with progress reports in the Royal Review

Areas for improvement and suggestions:

- Additional Communication in Royal Review- Name of construction company/ subcontractors (**ONGOING. First communication sent 9/13**)
- As needed updates in Royal Review and Facebook
- Construction schedule given to parents
- Identification of construction workers- (**EMAILED TO PARENTS 9/13**)
 - ID picture badge
 - Check in at front desk using Raptor system (**REQUIRED AND COMMUNICATED TO PARENTS**)
 - Background checks?
- School marshal to check construction area periodically
- Added presence of teachers/volunteers around the construction area, drop-off and pick-up and recess when needed
- Reach out to other schools who have held school during construction hours and ask for their best practices
- Does the fencing around the kinder playground area come down? If so, what is the safety protocol for that?
 - Should we do indoor recess on those days?
- Noise limits during school hours?
 - Communication to parents/guardians to when more noisy activities will be happening, especially during times of testing
 - Noise cancelling walls outside East wall
- What overall protective barriers will be in place during construction?
 - Double fencing to deter communication between workers and students? (**EMAIL SENT 9/12 TO CONTRACTOR FROM DR. EDWARDS REQUESTING MESH VISIBILITY BLOCK TO THE CONSTRUCTION FENCE THAT IS PHASE II FENCE AND THE PLAYGROUND**)
